- Can be used indoor or outdoor
- Solid color throughout material
- Impervious to moisture
- Chemical resistant
- Resistant to fading

DOOR STYLES & WOOD

QUEST OUTDOORS

Cabinets to expand your living environment.

CYPRESS

(SHOWN WITH MINERAL OIL APPLIED.)

Fairly straight to medium grained wood, light yellow to reddish brown. Heartwood is very durable with little required maintenance beyond an occasional wipe down of exposed surfaces. Dimensionally stable with average hardness. Decay and insect resistant.

FINISH FOR TEAK & CYPRESS

Crystal does not apply any finish but does require initial and subsequent applications of one of the commercially available oils specifically formulated for teak and preferred for cypress as well; see the warranty for more information. Follow the manufacturer's application directions and their recommendations for maintenance applications to renew the appearance and protect the wood.

TEAK

(SHOWN WITH MINERAL OIL APPLIED.)

Extremely durable with little required maintenance beyond an occasional wipe down of exposed surfaces. Dimensionally stable with average hardness. Decay and insect resistant.

STAINLESS STEEL

QQ D2

(SHOWN IN BROWN POLY)

QQ D1

(SHOWN IN TAN POLY)

The solid polyethylene door styles are available in tan, black or brown. Other colors available upon request.

ORGANIZE YOUR OUTDOOR SPACE

Shown below is a 3 drawer base cabinet, pull out waste baskets and roll-out shelves (shown in brown). Other organization features available are tray dividers, drawer divides and cabinet partitions.
