

WHY BUY FSC®?

By selecting Crystal's FSC®-certified maple and cherry cabinetry, you are supporting the responsible management of the world's forests.

The Forest Stewardship Council® (FSC) is an international nongovernmental organization that promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests. To learn more, visit www.fsc.org

Chain of Custody Certification

Crystal Cabinet Works, Inc. has held FSC® chain of custody certification since 2009 as part of its commitment to environmental stewardship and to enhance the environmental attributes of its cabinetry.

Consumers are increasingly concerned about environmental issues and the origin of the products they buy. In 2017, Crystal began selling only FSC-certified products in our most popular wood species maple and cherry in our premium custom series. Consumers may be assured that when ordering FSC®-certified cabinetry, the wood is sourced responsibly from well-managed forests. In fact, FSC-certified cabinetry means that each component is traceable back to the forest from which it was sourced.

GREEN BUILDING STANDARDS

- FSC®-certified cabinetry will contribute toward earning the Materials & Resources Environmentally Preferable Products credit pursuant to LEED v4.
-
- FSC®-certified cabinetry will contribute toward earning the Renewable Materials points for certified wood-based products in the NAHB's 2015 National Green Building Standard.

FSC® helps take care of forests for future generations.
